Dear Ken:

During our meeting of September 4, 1986, during which we discussed the impact of the possible prohibition of the American Bottoms Treatment Plant filter cake (sludge) from the St. Clair County landfills, I said I would check on the availability of the Barton site for our material. Our hauler, BFI, has contacted GSX, operator of the Barton site, and was told that Barton would not accept our sludge.

As I mentioned to you when we discussed this on the telephone, any suggestions are welcome.

Sincerely,

George R. Schillinger
Plant Manager
